PROJECT WORKS:

♦ **Online Library Management System(2012)**

- PHP ,MYSQL

The main objective of the Project on Library Management System is to manage the details of Student, Books, Issues, Librarian, Member. It manages all the information about Student, Address, Member, Student. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the Student, Books, Address, Issues. It tracks all the details about the Issues, Librarian, Member.

▪ **Online Recharge Management System(2014)**

- PHP ,MYSQL

This project is my effort for Online Mobile Recharge of mobile. This project useful for online recharging of mobile. This System provides recharge of many mobile companies as well as all kind of recharge are possible. This System will provide facility for customer to recharge mobile at anytime from anywhere. This System keeps the history of the past recharges. The user have to register himself.

▪ **Centralized ATM Solution(2015)**

- ASP.NET,MS SQL,WPF

This project helps to overcome the problem of complexity and gives simplest way to safeguard the ATM transaction. Whenever person enters account number onto the ATM machine, the system needs PIN to validate the customer. If PIN gets verified, it makes a call to the user's mobile. If the user wishes to make an operation, then transaction process takes place.
